What's new

Dock

- Added support for Trial Flight. Users can assess the task performance and media file transfer performance after completing dock configuration.

- Added support for Silent Mode. In Silent Mode, the operation noise will be reduced and the cooling performance of the air conditioning system will be slightly affected.

- Added support for transferring and managing the unlocking licenses and updating flight safety database in DJI FlightHub 2.

- Added support for switching between camera views in the dock liveview to check inside or outside the dock.

- Added support for Flight Trajectory Playback. Users can view the flight trajectory in the Task Plan Library after a planned task is completed.

- Optimized functions for Live Flight Controls. Refer to the **DJI FlightHub 2 Release Note** for more information.
